

PANTHER

Gear backpack

PANTHER

Gear backpack PANTHER is designed to hold five D25 hoses with a length of 20m, a divider, two stream nozzles and two C/D adaptors. It has **one extra large inner compartment**, which is divided into **two parts by a divider**. The **lower compartment** is designed for four hoses and is accessible through a separate **side opening** that can be closed with a double-zip with a handle and secured with Velcro. The hoses are separated by **dividers**. The **upper compartment** is designed for the fifth hose, divider, two stream nozzles and C/D adaptors. It is accessible through a separate **upper opening** that can be closed with a double-zip with a handle and secured with Velcro. The hose is separated from the divider by a divider. The divider and nozzles are secured with **an elastic strap** and adaptors are stored in **pockets secured with Velcro**.

Thanks to the top and side openings, there is no need to remove the backpacks to unload the hoses. One firefighter carries a backpack and extinguishes with a nozzle. The second firefighter takes out the hoses and extends a stream.

Specification
PANTHER

PANTHER

When the backpack is empty, it is possible to **remove all dividers**, store them at the bottom of the backpack and use the main compartment for moving any material - water in PET, food or used hoses after an intervention.

Gear backpack PANTHER is equipped with **MOL system** on the front side for attaching other equipment such as **engineering tools**, dividers, nozzles, etc. To store personal equipment, **pockets or water pockets** can be attached to the front or side of the backpack. On the front side are **two Velcro fasteners 17x4cm** for attaching **name tags**. There are also **reflective strips** on the front and side of the backpack for good visibility in the field.

Gear backpack PANTHER is made from **extra robust Cordura® fabric** coated with a PU. **Comfortable harness system** guarantees comfort and offers wide range of settings for yours backs. Harness system is consists of fully adjustable **wide shoulder, waist and sternum straps**. **A radio and microphone** can be attached to the shoulder straps. **The double soft dorsal pad** guarantees comfort and protects yours back against the load. The insert is also fitted on the front side and the entire circumference of the backpack. The back is also **reinforced with two plastic straps** that are placed under the shoulder straps along the entire length of the backpack. This ensures sufficient **stiffness** of the backpack when fully loaded. For easy carrying, the backpack is also equipped with **a handle**.

PANTHER

Gear backpack PANTHER is dimensionally adapted to the construction of the fire truck. It can be inserted freely into the compartment or directly into the crate.
