ERMAK JUNIOR is the first fully functional firefighting water backpack for our smallest firefighters. In its design, we put all our experiences we have gained from the development of firefighting water backpack Ermak 20 which is in the market for 10 years and is used by professional firefighters and volunteers in the Czech Republic and many states in EU.

The little brother inherited their best features. Double action handheld pump offers very light stroke. Comfortable harness system guarantees comfort and offers wide range of settings for children's backs. Two-layer design with robust and waterproof outer layer that protects the inner layer. The soft dorsal pad guarantees comfort and protects children's back against the cold water. The large cap enables easy filling of water without removing. 3D design of inner layer which can hold more water and the water doesn't push children's back.

In the design of the backpack we kept in our mind two main things. The first is comfort of our children. The second is long life of the backpack which depends on used materials. Metal handheld pump, robust outer layer in red color, quality hose and solid plastic parts. This all guarantees the long life of our backpack.

ERMAK JUNIOR is suitable for children from 4 years old.

### Basic technical parameters

Height	400 mm
Width	280 mm
Depth	120 mm
Weight	1.2 kg
Volume	7 l
Spraying distance	8 m
