

FILLING SYSTEM

for the firefighting backpacks

Filling system versions

Filling system 1 / Ball valve with D25 couplings /

Hose length [m]	0
Weight [g]	540

Filling system 2 / Filling hose, D25 coupling, quick-connect coupling/

Hose length [m]	1
Weight [g]	460

Filling system 3 / Filling hose, ball valve, D25 coupling, quick-connect coupling/

Hose length [m]	1
Weight [g]	930

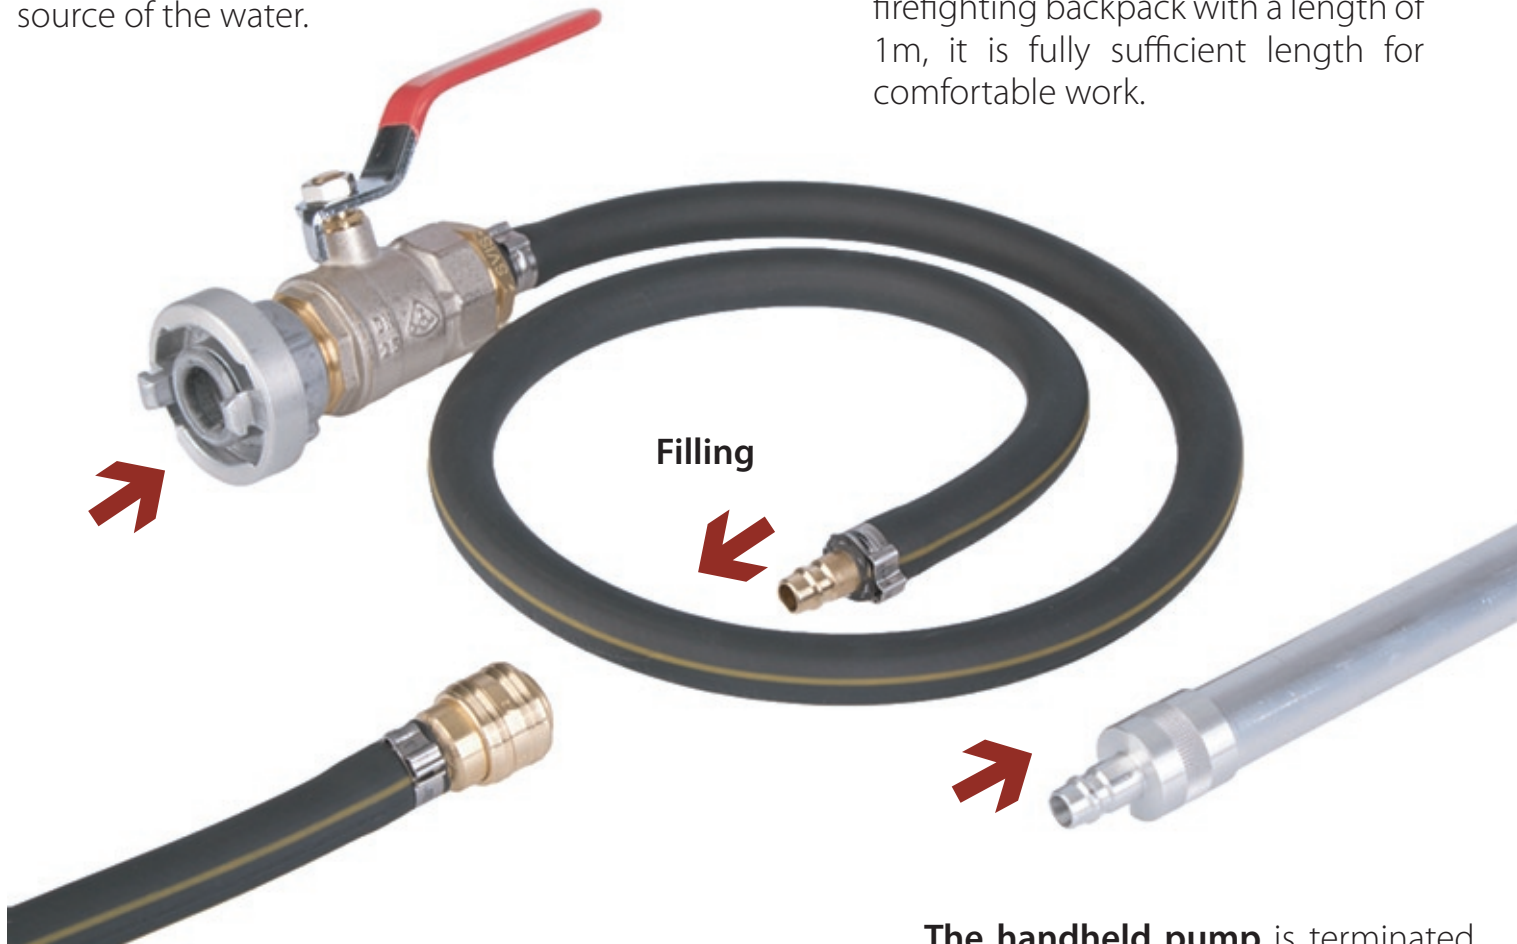

Description

The filling system allows you to easily fill our firefighting backpacks directly on your back in the field. For filling is used water from a vehicle or, for example, our ST series water tanks with a motor pump.

D coupling for connection to the source of the water.

The filling hose is 1m long as standard. With the hose of the firefighting backpack with a length of 1m, it is fully sufficient length for comfortable work.

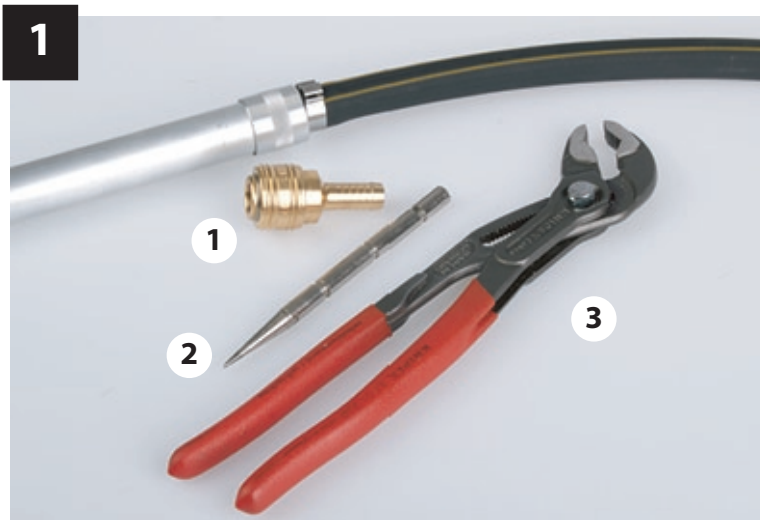

The quick-connect coupling of the firefighting backpack. The quick-connect coupling allows for quick switching between **filling / handheld pump**.

The handheld pump is terminated with a quick-connect coupling's plug. The filling system can therefore be used with an already purchased firefighting backpack without modifying.

Quick-connect coupling installation

The filling system can be ordered directly with the firefighting backpack. In this case, the firefighting backpack is already equipped with **a quick-connect coupling** at the factory. If you purchase a filling system for an older firefighting backpack, it is necessary to install a quick-connect coupling that is part of the filling system.

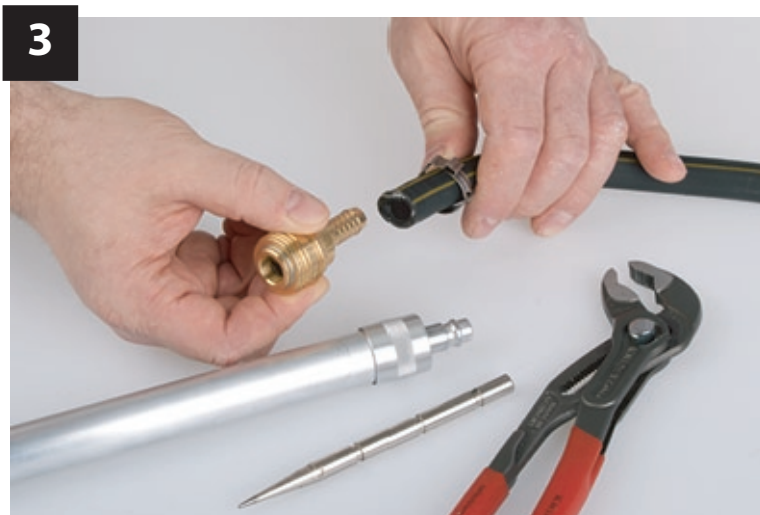

What do we need?

- 1** quick-connect coupling
- 2** sharp tip or screwdriver
- 3** pliers

Use a screwdriver or a sharp tip to loosen the hose clip and pull out the hose.

Replace the handheld pump plug with a quick-connect coupling.

Quick-connect coupling installation

4

Secure the hose clip with pliers.

5

We're done! Now we can attach the hose to the quick-connect coupling and continue using the firefighting backpack. We can remove the handheld pump at any time and connect the filling system to the firefighting backpack.
